WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/JP2004/015917

Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

The “predetermined processing” of claims 1-4, 18-21 and 26-29 is not clear in what kind of process it is.

The eighth embodiment is unclear. In paragraph 0089, there is a description such that the small interval divider/determinator 225 (omitted) determines whether the processing is performed by a moving image decoder 231. However, in paragraph 0093, it is described such that the small interval divider/determinator 225 (omitted) determines whether to perform interpolation in a time direction. Therefore, the processing to handle the determined result is different from each other.
